- If no Barrier Event has occurred, the Redemption Amount will be determined as follows:
The Redemption Amount corresponds to the Maximum Amount.
 - If a Barrier Event has occurred, the Redemption Amount will be determined as follows:
$$\text{Redemption Amount} = \text{Calculation Amount} \times R (\text{final}) / \text{Strike}$$

However, the Redemption Amount will not be higher than the Calculation Amount.
- (2) *Early Redemption Amount (k):* The Early Redemption Amount (k) for an Early Payment Date (k) is specified in § 1 of the Product and Underlying Data.

§ 5

Issuer's Extraordinary Call Right

Issuer's extraordinary call right: Upon the occurrence of a Call Event the Issuer may call the Securities extraordinarily by giving notice pursuant to § 6 of the General Conditions and redeem the Securities at their Cancellation Amount. Such call shall become effective at the time indicated in the notice. The application of §§ 313, 314 BGB remains reserved.

The "**Cancellation Amount**" shall be the fair market value of the Securities as of the first Banking Day before the extraordinary call becomes effective, determined by the Calculation Agent in its reasonable discretion (§ 315 et seq. BGB) under then prevailing circumstances.

The determination of the fair market value is based on the economic equivalent of the Issuer's payment obligations to the Security Holders consistent with the provisions for the redemption profile, interest or other additional amounts of the Securities that would otherwise be due after the day on which the extraordinary call becomes effective and which is adjusted taking into consideration the following parameters as of the first Banking Day before the extraordinary call becomes effective: the price of the Underlying, the remaining time to maturity, the estimated volatility, the expected dividends (if applicable), the current market interest rate as well as the interest spread associated with the credit default risk of the Issuer and any other relevant market parameter that can influence the value of the Securities.

The Cancellation Amount will be paid within five Banking Days following the date as of which the extraordinary call becomes effective, or at the date specified in the above mentioned notice, as the case may be, pursuant to the provisions of § 6 of the Special Conditions.

§ 6

Payments

- (1) *Rounding:* The amounts payable under these Terms and Conditions shall be rounded up or down to the smallest unit of the Specified Currency, with 0.5 of such unit being rounded upwards.
- (2) *Business day convention:* If the due date for any payment under the Securities (the "**Payment Date**") is not a Banking Day then the Security Holders shall not be entitled to payment until the next following Banking

Day. The Security Holders shall not be entitled to further interest or other payments in respect of such delay.

- (3) *Manner of payment, discharge:* All payments shall be made to the Principal Paying Agent. The Principal Paying Agent shall pay the amounts due to the Clearing System to be credited to the respective accounts of the depository banks and to be transferred to the Security Holders. The payment to the Clearing System shall discharge the Issuer from its obligations under the Securities in the amount of such payment.
- (4) *Interest of default:* If the Issuer fails to make payments under the Securities when due, the amount due shall bear interest on the basis of the default interest rate established by law. Such accrual of interest starts on the day following the due date of that payment (including) and ends on the effective date of the payment (including).

§ 7

Market Disruptions

- (1) *Postponement:* Notwithstanding the provisions of § 8 of the Special Conditions, if a Market Disruption Event occurs on an Observation Date, the respective Observation Date will be postponed to the next following Calculation Date on which the Market Disruption Event no longer exists.

Any Payment Date relating to such Observation Date shall be postponed if applicable. Interest shall not be payable due to such postponement.

- (2) *Discretionary valuation:* Should the Market Disruption Event continue for more than 8 consecutive Banking Days, the Calculation Agent shall determine in its reasonable discretion (§ 315 et seq. BGB) the respective Reference Price required for the calculations or, respectively, specifications described in these Terms and Conditions. Such Reference Price shall be determined in accordance with prevailing market conditions at 10:00 a.m. (Milan local time) on this 9th Banking Day, taking into account the financial position of the Security Holders.

If within these 8 Banking Days traded Underlying Linked Derivatives expire and are settled on the Determining Futures Exchange, the settlement price established by the Determining Futures Exchange for the there traded Underlying Linked Derivatives will be taken into account in order to conduct the calculations or, respectively, specifications described in these Terms and Conditions. In that case, the expiration date for those Underlying Linked Derivatives is the respective Observation Date.

§ 8

Adjustments, Type of Adjustment, Replacement Specification, Reversal of Adjustment, Notifications, Authorisation, Legal Provisions

- (1) *Adjustments:* If an Adjustment Event occurs the Calculation Agent is authorised to adjust these Terms and Conditions (the "**Adjustment**"); whether an Adjustment is to be made shall be determined by the Calculation Agent in its reasonable discretion (§ 315 et seq. BGB).

The goal of the Adjustment is to appropriately consider the economic impact of the circumstance that triggered the Adjustment Event, so that the economic characteristics of the Securities remain as unchanged as possible, taking into account the interests of the Security Holders as well as the Issuer ("**Adjustment Goal**"). A subsequent adverse change of the value of the Securities resulting from the Adjustment cannot be ruled out.

The Calculation Agent determines all Adjustments according to this § 8 in its reasonable discretion (§ 315 et seq. BGB), taking into account the Adjustment Goal. It will only make an Adjustment if such Adjustment is reasonable for the Security Holders as well as for the Issuer; whether this is the case shall be determined by the Calculation Agent in its reasonable discretion (§ 315 et seq. BGB).

Within the context of an Adjustment the Calculation Agent proceeds as follows:

- (a) *Adjustment in accordance with the Determining Futures Exchange:* In general, the Calculation Agent will undertake the Adjustment in terms of content and timing in a way that to the greatest extent matches the designated Adjustment by the Determining Futures Exchange regarding the Underlying Linked Derivatives. The Calculation Agent is, however, also authorised to make an Adjustment if there is no adjustment made to the Underlying Linked Derivatives by the Determining Futures Exchange. In this case the Calculation Agent will make the Adjustment, if any, in accordance with the rulebook of the Determining Futures Exchange with respect to the Underlying Linked Derivatives.

- (b) *Deviating Adjustments:* In particular in the following cases the Calculation Agent is authorised to make Adjustments deviating from the adjustments made by the Determining Futures Exchange in order to take into account the Adjustment Goal in an appropriate manner:
- (i) The adjustment envisaged by the Determining Futures Exchange regarding the Underlying Linked Derivatives is impossible for the Issuer or the Calculation Agent or technically not feasible within reasonable economic efforts; whether this is the case shall be determined by the Calculation Agent in its reasonable discretion (§ 315 et seq. BGB).
 - (ii) The adjustment envisaged by the Determining Futures Exchange regarding the Underlying Linked Derivatives is unreasonable for Security Holders, the Calculation Agent or the Issuer (e.g. because the Issuer would have to breach internal trading restrictions in order to hedge its payment obligations under the Securities); whether this is the case shall be determined by the Calculation Agent in its reasonable discretion (§ 315 et seq. BGB).
 - (iii) The adjustment envisaged by the Determining Futures Exchange regarding the Underlying Linked Derivatives is not suitable to meet the Adjustment Goal; whether this is the case shall be determined by the Calculation Agent in its reasonable discretion (§ 315 et seq. BGB).
- (2) *Type of Adjustment:* In the context of an Adjustment the Calculation Agent may undertake in particular the following measures in accordance with paragraph (1) above:
- (a) *Adjustment of Adjustable Product Data:* The Calculation Agent may redefine the Adjustable Product Data based on an adjustment factor (e.g. in case of a capital increase against cash contribution, issue of securities with options or conversion rights in shares, a capital increase from company funds, a distribution of special dividends or other measures undertaken by the company, that issued the Underlying or a third party, that impacts the computed value of the Underlying not only in an insignificant way, based on a change of a legal or economic situation, in particular a change of the fixed assets or equity of the company).
 - (b) *Replacement of the Underlying:* In case of a take-over or a merger or similar measure with respect to the Underlying the Calculation Agent can replace the Underlying with the share of the successor of the issuer of the original Underlying or with another share of – inter alia – comparable liquidity and industry affiliation as the original Underlying (the "**Replacement Underlying**"). Furthermore, until completion of the take-over or merger (excluding), the Calculation Agent may determine that either the shares submitted for sale or submitted for exchange are to be the Replacement Underlying.
- In case of a split or a similar measure with respect to the Underlying the Calculation Agent may determine (i) a basket of shares and/or securities or (ii) a basket of shares and/or securities and a cash component to be the Replacement Underlying. The Calculation Agent may exclusively select, in deviation from the Adjustment made by the Determining Futures Exchange, the share with the highest market capitalisation or another share from the basket of shares determined by the Determining Futures Exchange with – inter alia – comparable liquidity and industry affiliation as the original Underlying to be the Replacement Underlying. In this case the Calculation Agent will, if necessary, determine an adjustment factor by itself to meet the Adjustment Goal and will undertake an Adjustment according to paragraph 2 (a) above.
- If the Calculation Agent designates a Replacement Underlying, from the Adjustment Date on (as defined in paragraph (5) below), every reference to the Underlying in these Terms and Conditions shall be a reference to the Replacement Underlying, unless the context requires otherwise.
- (3) *Replacement Specification:* If a published price of the Underlying as required pursuant to these Terms and Conditions is subsequently corrected and the correction (the "**Corrected Value**") will be published by the Relevant Exchange after the original publication, but still within one Settlement Cycle, then the Calculation Agent will notify the Issuer of the Corrected Value without undue delay and shall again specify the respective value by using the Corrected Value (the "**Replacement Specification**") and publish it pursuant to § 6 of the General Conditions.
- (4) *Reversal of Adjustment:* If an Adjustment Event that has occurred subsequently ceases to exist (for example, if the effectiveness of a merger subsequently ceases to exist due to the agreement on the merger or a sovereign prohibition or lack of approval), the Calculation Agent shall be entitled to reverse a previously made Adjustment pursuant to this § 8 if this corresponds to the Adjustment Goal.

- (5) *Notifications, Authorisation:* All Adjustments as described in this § 8 and undertaken by the Calculation Agent as well as the designation of the time of the first application (the "**Adjustment Date**") take place by notification of the Security Holders according to § 6 of the General Conditions. Hereby reference is made to the aforementioned notifications.

Further, the Issuer shall be deemed to be authorised vis-à-vis the Registrar within the meaning of §§ 5 paragraph 2 no. 3, 14 paragraph 1 no. 2 lit. c) eWpG to issue instructions, in order to authorise the necessary amendments to the deposited Terms and Conditions and to the registration particulars set-out in § 13 paragraph 1 no. 1 and 4 eWpG.

- (6) *Legal Provisions:* The application of §§ 313, 314 BGB remains reserved.

** The items marked with "**" have been extracted from the audited combined management report of UniCredit Bank GmbH for the financial year from 1 January 2025 to 31 December 2025.

What are the key risks that are specific to the Issuer?

Risks related to the Issuer's financial situation: Risk that HVB Group will not be able to meet its payment obligations on time or in full or to obtain sufficient liquidity when required as well as that liquidity will only be available at higher interest rates, and the risk that the bank will only be able to liquidate assets on the market at a discount could create liquidity problems for HVB Group and thus could result in a limited ability to fund its activities and meet its minimum liquidity requirements.

Risks related to the Issuer's specific business activities: Risks arising from the normal business activities of HVB Group, which involve credit risk in the lending business, market risk in the trading business as well as risks from other business activities such as the real estate business activities of HVB Group could have an adverse impact on HVB Group's operating results, its assets and its financial situation.

General risks related to the Issuer's business operations: Risks from inadequate or failed internal processes, people and systems or from external events, risks caused by the adverse perception of the image of the financial institution by stakeholders, risks from unexpected adverse changes in the future earnings of the bank as well as risks from concentrations of risk and/or earnings positions could result in financial losses, a downgrade of HVB's rating and an increase in the business risk of the HVB Group.

Legal and regulatory risk: Changes of the regulatory and statutory environment of HVB could result in higher capital costs and a rise of costs for the implementation of regulatory requirements. In cases of non-compliance with regulatory requirements, (tax) laws, regulations, statutory provisions, agreements, mandatory practices and ethical standards, the public perception of HVB Group as well as its earnings and financial situation could be negatively affected.

Strategic and macroeconomic risk: Risks resulting from management either not recognising early enough or not correctly assessing significant developments or trends in the bank's environment and risks arising from negative economic developments in Germany and on the international financial and capital markets could have a negative effect on the assets, liabilities, financial position and profit or loss of HVB Group. In particular, global trade frictions, persistent geopolitical tensions, structural weaknesses in key industry sectors, the society-wide trend towards use of artificial intelligence, further rising protectionism (especially in the form of higher tariffs US tariffs on EU goods and restricted access to critical input goods such as rare-earth minerals from China), less dynamic growth in China and a slower than expected recovery in the German real estate market can be major downside risks to the German economy. In addition, if any of the aforementioned risks materialises, turbulence could occur on financial and capital markets.

What are the main features of the Securities?

Automatic Early Redemption

Provided that no Call Event has occurred, the Securities allow for an automatic early redemption at the respective Early Redemption Amount (k) on the respective Early Payment Date (k), if an Early Redemption Event (k) has occurred.

Provided that no Call Event and no Early Redemption Event (k) has occurred, the Securities will be redeemed on the Final Payment Date by payment of the Redemption Amount as follows:

- If no Barrier Event has occurred, the Redemption Amount corresponds to the Maximum Amount.
- If a Barrier Event has occurred, the Redemption Amount corresponds to the Calculation Amount multiplied by the quotient of R (final) divided by the Strike. The Redemption Amount is not greater than the Calculation Amount.

Additional definitions and product terms

Barrier means the product of the Barrier Level and R (initial).

A Barrier Event occurs if R (final) is lower than the Barrier on the Final Observation Date.

R (final) means the Reference Price of the Underlying on the Final Observation Date.

R (initial) means the Reference Price of the Underlying on the Initial Observation Date.

Strike means the product of the Strike Level and R (initial).

Barrier Level:	70%
Calculation Amount:	PLN 1,000.00
Final Observation Date:	11 September 2029
Final Payment Date:	18 September 2029
Initial Observation Date:	15 September 2026
Maximum Amount:	PLN 1,495.00
Strike Level:	100%

Extraordinary termination right: Upon the occurrence of one or more call events (for example, if price quotation of the Underlying on the Relevant Exchange is suspended indefinitely or permanently discontinued and no Replacement Exchange is available or could be determined) (the "Call Event") the Issuer may call the Securities extraordinarily and redeem the Securities at their Cancellation Amount. The "Cancellation Amount" is their fair market value.

Adjustments to the Terms and Conditions: The Calculation Agent may adjust the Terms and Conditions of the Securities if an adjustment event (for example, each measure taken by the company that has issued the Underlying or by a third party which, as a result of a change in the legal and financial position, affects the Underlying) (the "Adjustment Event") occurs.

Status of the Securities: The Securities constitute direct, unconditional and unsecured obligations of the Issuer. The Securities rank *pari passu* with all other unsecured and unsubordinated present and future obligations of the Issuer. Exception: obligations which have a preference or subordination under the law.

Where will the Securities be traded?

Admission to trading: No application for the Securities to be admitted to trading on a regulated market has been made.

What are the key risks that are specific to the Securities?

Credit risk of the Issuer and risks in relation to resolution measures in relation to the Issuer: The Securities constitute unsecured obligations of the Issuer vis-a-vis the Security Holders. Any person who purchases the Securities therefore relies on the creditworthiness of the Issuer and has, in relation to his/her position under the Securities, no rights or claims against any other person. Security Holders are subject to the risk of a partial or total failure of the Issuer to fulfil obligations which the Issuer is liable to perform under the Securities in whole or in part, for example, in the event of the Issuer's insolvency. The worse the creditworthiness of the Issuer is the higher is the risk of a loss. In the case of realization of the credit risk of the Issuer the Security Holder may sustain a total loss of his/her capital, even if the Securities provide for a Minimum Amount at their maturity. Moreover, Security Holders may become subject to resolution measures in relation to the Issuer if the Issuer is failing or likely to fail. The obligations of the Issuer under the Securities are not secured, guaranteed by third parties or protected by any deposit protection or compensation scheme.

Risks related to market value-influencing factors: The Security Holders bear the risk that the market price of the Securities may be subject to severe fluctuations during the term of Securities and that the Security Holder is not able to sell the Securities at a specific time or for a specific price. The market value of the Securities will be affected by a number of factors. These are inter alia the creditworthiness of the Issuer, the relevant prevailing interest and yield rates, the market for similar securities, the general economic, political and cyclical conditions, the tradability and, if applicable, the remaining term of the Securities as well as additional Underlying-related market value-influencing factors. The market value of the Securities as well as the amounts distributable under the Securities primarily depend on the price of the Underlying.

Risks related to the Redemption Amount: The Redemption Amount may be less than the Issue Price or the purchase price or even be zero. This means, the Security Holder only achieves a return if the Redemption Amount exceeds the individual purchase price of the Security Holder. A participation in a

favourable performance of the Underlying beyond the Maximum Amount is excluded. **A total loss is possible.**

Risks related to a Barrier Event: If a Barrier Event occurs, a more advantageous pay-out formula will be disappplied. In any case the Security Holder may lose his invested capital in total or in part.

Risks arising from missing ongoing payments: The Securities do not bear interest or grant any other conditional or unconditional rights for ongoing payments which could compensate possible losses of principal.

Risks related to an Automatic Early Redemption: If an Early Redemption Event occurs, the Security Holder will neither participate in any future favourable performance of the Underlying nor be entitled to further payments under the Securities after an early redemption. In addition, the Security Holders are exposed to the risk that they may only reinvest the principal received due to an early repayment of the Securities to less favourable conditions.

Risks related to shares: The Securities are associated with similar risks for the Security Holders as in case of a direct investment in the shares specified as Underlying. The price of a share can fall sharply or it can become worthless, e.g. due to the insolvency of the issuer of the share.

Risks related to potential conflicts of interests: Conflicts of interest in relation to the relevant Issuer or the persons entrusted with the offer may arise, which may result in a decision to the Security Holder's disadvantage.

"**Kwota Umorzenia**" stanowi ich godziwą wartość rynkową.

Korekty Warunków Emisji: Agent Obliczeniowy może skorygować Warunki Emisji Papierów Wartościowych w przypadku, gdy zdarzenie korekty (na przykład, każdy środek podjęty przez spółkę lub osobę trzecią, które wyemitowały Instrument Bazowy, a który to środek w wyniku zmiany sytuacji prawnej i finansowej, wpływa na Instrument Bazowy) ("**Zdarzenie Korekty**") wystąpi.

Status Papierów Wartościowych: Papiery Wartościowe stanowią bezpośrednie, bezwarunkowe i niezabezpieczone zobowiązania Emitenta. Papiery Wartościowe mają pierwszeństwo na równi z wszystkimi innymi niezabezpieczonymi i niepodporządkowanymi obecnymi i przyszłymi zobowiązaniami Emitenta. Gdzie Papiery Wartościowe będą przedmiotem obrotu?

Dopuszczenie do obrotu: Nie złożono wniosku o dopuszczenie Papierów Wartościowych do obrotu na rynku regulowanym.

Jakie są kluczowe ryzyka właściwe dla Papierów Wartościowych?

Ryzyko kredytowe Emitenta i ryzyko związane ze środkami naprawczymi w odniesieniu do Emitenta: Papiery Wartościowe stanowią niezabezpieczone zobowiązania Emitenta wobec Posiadaczy Papierów Wartościowych. Każda osoba nabywająca Papiery Wartościowe polega zatem na zdolności kredytowej Emitenta i nie posiada, w odniesieniu do swojej pozycji wynikającej z Papierów Wartościowych, żadnych praw ani roszczeń wobec jakiegokolwiek innej osoby. Posiadacze Papierów Wartościowych podlegają ryzyku częściowego lub całkowitego niewykonania przez Emitenta zobowiązań, które Emitent jest zobowiązany wykonać w ramach Papierów Wartościowych w całości lub w części, na przykład w przypadku niewypłacalności Emitenta. Im gorsza jest wiarygodność kredytowa Emitenta, tym większe jest ryzyko poniesienia straty. W przypadku realizacji ryzyka kredytowego Emitenta Posiadacz Papierów Wartościowych może ponieść całkowitą stratę swojego kapitału, nawet jeśli Papiery Wartościowe przewidują Kwotę Minimalną w terminie zapadalności. Ponadto Posiadacze Papierów Wartościowych mogą podlegać środkom restrukturyzacji i uporządkowanej likwidacji w odniesieniu do Emitenta, jeżeli Emitent jest niewypłacalny lub może być niewypłacalny. Zobowiązania Emitenta z tytułu Papierów Wartościowych nie są zabezpieczone, gwarantowane przez osoby trzecie ani chronione przez jakikolwiek system ochrony depozytów lub system rekompensat.

Ryzyko związane z czynnikami wpływającymi na wartość rynkową: Posiadacze Papierów Wartościowych ponoszą ryzyko, że cena rynkowa Papierów Wartościowych może podlegać poważnym wahaniom w okresie ważności Papierów Wartościowych oraz że Posiadacz Papierów Wartościowych nie będzie w stanie sprzedać Papierów Wartościowych w określonym czasie lub po określonej cenie. Na wartość rynkową Papierów Wartościowych będzie mieć wpływ szereg czynników. Należą do nich między innymi zdolność kredytowa Emitenta, odpowiednie dominujące stopy procentowe i stopy zwrotu, rynek

podobnych papierów wartościowych, ogólne warunki gospodarcze, polityczne i cykliczne, zbywalność oraz, w stosownych przypadkach, pozostały okres ważności Papierów Wartościowych, a także dodatkowe czynniki wpływające na wartość rynkową związane z Instrumentem Bazowym. Wartość rynkowa Papierów Wartościowych oraz kwoty podlegające wypłacie w ramach Papierów Wartościowych zależą przede wszystkim od ceny Instrumentu Bazowego.

Ryzyko związane z Kwotą Wykupu: Kwota Wykupu może być niższa niż Cena Emisyjna lub cena zakupu, a nawet wynosić zero. Oznacza to, że Posiadacz Papierów Wartościowych uzyskuje zwrot tylko wtedy, gdy Kwota Wykupu przekracza indywidualną cenę zakupu Posiadacza Papierów Wartościowych. Udział w korzystnych wynikach Instrumentu Bazowego powyżej Kwoty Maksymalnej jest wykluczony. **Możliwa jest strata całkowita.**

Ryzyko związane ze Przypadkiem Naruszenia Bariery: W przypadku wystąpienia Przypadku Naruszenia Bariery nie zostanie zastosowana korzystniejsza formuła wypłaty. W każdym przypadku Posiadacz Papierów Wartościowych może stracić swój zainwestowany kapitał w całości lub w części.

Ryzyko związane z Automatycznym Przedterminowym Wykupem: W przypadku wystąpienia Zdarzenia Przedterminowego Wykupu, Posiadacz Papierów Wartościowych nie będzie ani uczestniczył w jakichkolwiek przyszłych korzystnych wynikach Instrumentu Bazowego, ani nie będzie uprawniony do dalszych płatności z tytułu Papierów Wartościowych po przedterminowym wykupie. Ponadto Posiadacze Papierów Wartościowych są narażeni na ryzyko, że mogą reinwestować kapitał otrzymany z tytułu przedterminowej spłaty Papierów Wartościowych wyłącznie na mniej korzystnych warunkach.

Ryzyko związane z akcjami: Papiery Wartościowe wiążą się z podobnym ryzykiem dla Posiadaczy Papierów Wartościowych, jak w przypadku bezpośredniej inwestycji w akcje określone jako Instrument Bazowy. Cena akcji może gwałtownie spaść lub stać się bezwartościowa, np. z powodu niewypłacalności emitenta akcji.

Ryzyko związane z potencjalnymi konfliktami interesów: Mogą wystąpić konflikty interesów w odniesieniu do danego Emitenta lub osób, którym powierzono przeprowadzenie oferty, co może skutkować podjęciem decyzji na niekorzyść Posiadacza Papierów Wartościowych.
